

**AUG 11 1992**

**Request for Comments on the Revised Feasibility Study Report for the Dayco Corp./ L. E. Carpenter Co. Site in Wharton, NJ**

**Jonathan Josephs, Project Manager  
New Jersey Superfund Branch II**

**Dennis Santella, Chief  
Pre-remedial and Technical Support Section  
Program Support Branch**

EPA has received a revised feasibility study (FS) report for the above-referenced site. This revision is dated July 1992 and it is intended to address previous comments prepared by EPA and NJDEPE. Fred Luckey of your staff helped prepare the EPA comments on the prior draft.

The purpose of this memorandum is to request comments from your section on the revised document. While a comprehensive review of the document isn't needed (NJDEPE is the lead agency for this site), there may be some areas of importance (e.g., problem areas identified in the past comments) that should be examined. Because of Mr. Luckey's past involvement, I am sending directly to him a copy of this memo together with a copy of the revised FS report.

I expect that NJDEPE will soon be setting the due date for comments on this report. I will provide further information on the review schedule as I receive it.

I look forward to receiving your section's comments on the revised FS report.

Please contact me at extension 4-8098 if there is a need to discuss this matter.

cc: F. Luckey, PSB (with report)
